

# How will the 2007 Bond impact Housman Elementary?

Housman was constructed in 1950. While several renovations have been made over the years, additional upgrades to the existing building would be cost prohibitive.

In addition, the school has drainage issues due to differing elevations of classroom wings added over time. Site utilities are original and beyond their useful life.

Housman will be rebuilt at its current location. Recent additions will be retained and incorporated into the new design of the school.
