Years of service in SBISD *

This is my first year at SBISD.

What skills and experience do you bring that would enhance your contribution to the DIT? *

I am a seventh year high school teacher and I have taught diverse learners. During my time in education I have witnessed students from diverse backgrounds succeed. I know the importance of the school house and how it can be an agent of change for an entire family. I believe all students have the ability to learn and achieve. Moreover, I know the importance of creating differentiated lessons and paths for students. Are students are diverse in SBISD and should have just as diverse opportunities after they graduate. I am a graduate of Relay Graduate School of Education and come with an expertise in creating student centered education. I am also a Student at Houston Christian University pursuing a Masters in Administration. My educational background provides me with the pedagogical expertise to help contribute to the District Improvement Team. My passion for education and our community provide me with the social and emotional due diligence for the position.

What are the major challenges you see SBISD facing in the next two years? *

We have an increasing diverse population at SBISD that range in learning styles. A major area of focus should be creating student driven lessons that equipped our students with academic skills and life skills to make them vital members of society. Ensuring we serve all families and remain a trusted unbiased district that provides opportunities to a range of families.

What role do you see the DIT having to address these challenges? *

My role would be to voice my observations from my campus and my classroom. To provide suggestions and to learn from other campuses. I believe in a democratic solution style and I would like to work with our district as a family. We all can learn from one another and we all can build each other up.

What knowledge and/or experience do you hope to gain by serving as a DIT member? *

I want to learn how the district takes the voices of multiple stakeholders into account to make policy changes. In addition, I hope to gain pedagogical and logistical knowledge from the people on the team.
