# ITSLEARNING PARENT PORTAL GUIDE

itslearning is an online learning platform designed to facilitate learning for students, parents and staff, creating learning opportunities that extend beyond the school day.

---

LET'S GET STARTED!

# OVERVIEW FOR PARENTS

The itslearning Parent Portal deepens the home-school connection and facilitates conversations with your student about his or her academic progress. In itslearning, teachers create lesson plans, deliver instruction, provide targeted learning resources and share learning experiences. Parents and students will find lessons, tasks and resources while creating and working collaboratively with classmates.

## DASHBOARD

Your parent dashboard for each student provides information in four major areas: Student Information, Course Overview, Events and Tasks.
