What skills and experience do you bring that would enhance your contribution to the DIT? *

I have been teaching for more than 10 years. I have worked in the public and private sectors during that time and have seen what assists in education and what is an unnecessary burden to both teachers and students. I am young enough to understand the necessity of technology in the classroom but practical enough to know that technology won't solve every problem for teachers and students. I have taught G/T students/LEP students/ students in danger of failing and realize that every student is unique in their needs and one solution can't be the right one for every student. Education should focus on the reality of our world and using our subjects to help students understand that what they are learning will help them in the future.

What are the major challenges you see SBISD facing in the next two years? *

Budget issues in regards to the state cutting funding for support staff and paraprofessionals that assist teachers in their daily functions to allow challenged students to be successful.

What role do you see the DIT having to address these challenges? *

Understanding the pivotal roles on each campus such as support staff (inclusion teachers, SPED teachers) and their needs including those who are not in the mainstream classroom.

What knowledge and/or experience do you hope to gain by serving as a DIT member? *

To understand how decisions are made on the larger scale (district wide) and how this group utilizes data from each campus to make informed decisions based on campus needs.
